WITNESS MY HAND AND SEAL this 14th day of September, 1968.

*Robert P. Westergaard*  
State Engineer.

Remarks.--The reservoir to be constructed embraces the western part of a small pond, created by run-off from melting snows in the early spring, and having a maximum capacity of not over five acre-feet of water, and entirely drying up, or remaining water becoming unfit for watering purposes by August 1st. Applicant has been watering his sheep at the pond for the past fourteen years, and the proposed works will increase the water supply and depth, and decrease the surface area so evaporation will be less and a supply be conserved for watering purposes during the full grazing season in that section.
